EMPOWIRE, LLC

We help K-12 educators to embrace and effectively use technology and student-centered teaching methods so they can feel confident, empowered, and in control of their classrooms while engaging students and helping them thrive in today's fast-changing world.

PROBLEM

Despite U.S. schools spending $18 billion annually on professional development, K-12 teachers and school districts lack effective integration of learner-centered strategies with educational technology. This gap prevents educators from confidently implementing technology-rich, student-centered teaching practices:

- 71% of teachers are dissatisfied with current professional development offerings. (Gates Foundation, 2014)
- 56% of K-12 teachers cite insufficient training as a barrier to effective technology use in classrooms. (Gallup & New School Venture Fund, 2019)
- Only 42% of administrators report that their professional development systems can facilitate personalized learning. (Frontline Education, 2024)
- 90% of districts spend federal funds on short-term trainings or conferences, which often fall short of high-quality professional development criteria. (US Dept. of Education, 2022)

SOLUTION

At Empowire, we provide customized educational solutions designed to address these challenges through Professional Learning & Training, Curriculum Design & Development, Educational Technology Integration, Data-Driven Instruction & Evaluation, Leadership & Strategic Planning, Tech-Savvy Community Building, and CTE Program Development & Support; so that educators can confidently implement technology-rich, student-centered teaching practices that enhance learning outcomes and engagement.

RESULTS

- Increased teacher confidence in EdTech integration
- Enhanced student engagement and learning outcomes
- Improved alignment of technology with educational goals
- More effective use of data in decision-making
- Stronger community involvement in student learning

SKILLS

- Educational technology integration
- Learner-centered teaching strategies
- Curriculum design and development
- Data analysis and evaluation
- Leadership and strategic planning in education
- Community engagement and parent involvement

EXPERIENCE

- Ed.D in Education Technology and Master of Science in Administration
- Design and deliver impactful professional development
- Implement evidence-based instructional strategies
- Lead and manage technology initiatives
- Leading strategic planning initiatives for school districts
- Drive community engagement
- Data-Driven decision maker
- Create student-centered learning environments
- Develop effective CTE and certification programs
